TRANSPORTATION 101

Moving People and Goods
Who is the Washington State Transportation Commission?

An independent, seven-member body of citizens appointed by the Governor for six-year terms – three from east of the mountains and four from the west. The WSDOT Secretary and the Governor’s Office serve as non-voting members.

Roles and Responsibilities

• Proposes transportation policy and finance recommendations to the Governor and Legislature.

• Serves as the State Tolling Authority, adopting state highway and bridge tolls, and setting fares for Washington State Ferries.

• Provides a public forum for transportation policy development.

• Develops and issues a comprehensive, balanced 20-year statewide transportation plan.

• Conducts a statewide outreach program, including on-line surveys to gather public input into state transportation policy, to promote transportation education, and to understand local and regional transportation needs and challenges.
What is the statewide transportation system?

- 18,046 miles of city streets.
- 39,748 miles of county roads and seven county ferries.
- Over 7,000 miles of state highways and 23 ferries.
- 465 miles of Columbia-Snake River barge transport.
- Reservation roads, DNR and Forest Service roads.
- 32 transit agencies.
- 75 port districts in 33 of 39 counties.
- Sidewalks and bike paths.
- Over 7.1 million licensed passenger vehicles, trucks and motorcycles.
- Amtrak, Sounder, Link light rail, streetcars.
- Freight trains and trucking companies.
- Airlines and maritime shipping lines.
- Bicycles.
The Past

Federal
- Federal gas tax money built 90% of the Interstate System.
- Congress last increased the gas tax in 1993.

Washington State
- Tacoma Narrows Bridge, both Lake Washington floating bridges, the I-5 bridge between Vancouver and Portland, were all toll bridges.
- State gas tax increases in 2003 and 2005 were fully bonded to build capital projects.
- Puget Sound ferries were privately owned and operated until the state bought 16 vessels and 20 terminals in 1951.

Local
- Sales tax revenue is the primary fund source for city streets and most transit systems.
- Property tax revenue is the primary fund source for county roads.
The Present

Federal

• Since 2008, Congress has transferred over $73 billion from the general fund to Highway Trust Fund and Mass Transit Fund.

State

• 2015-17 Washington State Transportation Budget: $8.6 billion. This is about 11% of total state budget.
• The Connecting Washington transportation package invests $16 billion over 16 years:
  • $8.8 billion for road and safety projects.
  • $1.4 billion for highway maintenance and preservation.
  • $1.3 billion for non-highway projects such as bike paths, rail and transit.

Local

• Over $3 billion annual combined county, city and transit investment statewide.
What are the Sources of State Transportation Revenue?

Federal gas tax = 18.4¢ per gallon.

State gas tax = 49.5¢/gallon, as of July 1, 2016.

Ferry fares will generate $357 million in 2015 - 17, covering nearly 70% of WSF operating costs.

Toll revenue pays for debt, maintenance and operations for each tolled facility.
The Present: Local Transportation Revenue

- 70% of cities’ transportation funding is locally generated, primarily from sales tax. Over 80 cities are collecting revenue from a Transportation Benefit District.
- About 62% of counties’ transportation funding is locally generated, primarily from the county road share of the property tax.
- 11% of cities’ and counties’ transportation revenue is federal funds.
- 19% of cities’ transportation revenue and 27% of counties’ comes from the state.
  - 2.96¢ of state gas tax is distributed to cities
  - 4.92¢ of state gas tax is distributed to counties
- Local transit service revenue typically comes from:
  - Locally-approved sales tax
  - Fare box receipts
  - Federal grants
- Port revenue comes from user fees, leases, property tax and grants.
The Present: Personal Spending

- In 2012, Washington citizens and businesses spent over $17.3 billion on gasoline and other transportation fuel.

- In 2013, sales of new cars and trucks in the state exceeded $13.2 billion.

- The average Washington household spends $3,250 – $4,400 annually on vehicle fuel, compared to $607 for home heating.

- Average state and federal gas tax paid by a household annually is $559 - $669.

- Washington citizens and businesses spend about 4 times as much on transportation as state and local government does.
Gas Tax Breakdown

$49.4\text{c}$

$9.5\text{c}$

261 Transportation Partnership projects*

$5\text{c}$

160 Nickel projects

$11.9\text{c}$

Connecting Washington**

$11\text{c}$

Cities and counties local roads

$4\text{c}$

Pay off bonds funded by pre-2003 fuel tax

$8\text{c}$

Available for use on state highways, bridges and ferries:
- maintenance and operations
- preservation
- safety improvements

* Of the 9.5 cents, 8.5 cents is used by the state for highway projects, 1 cent goes to cities and counties for street and road improvements.

** The 11.9-cent gas tax increase will be phased in over the next two years. The first 7.0-cent increase occurs on August 1, 2015, followed by a 4.0-cent gas tax increase on July 1, 2016.
Revenue Uses – 2015 Connecting Washington Package

Connecting Washington Transportation Package
$16,086 M in Spending 2016-2031

- State Highway Improvements: 52% ($8,404)
- Debt Service: 2% ($300)
- State Highway Preservation: 9% ($1,360)
- Multimodal spending: 9% ($1,427)
- Local projects: 9% ($869)
- Ferries: 5% ($602)
- Other*: 2% ($371)
- Fish passage culverts

*Includes freight road projects, State Patrol support, and other program spending
State Gas Tax Revenue Obligations

Over the next decade approximately **70%** of the State’s net portion of motor vehicle fuel tax revenue is obligated to pay debt service for projects completed in the past 10 years or currently near completion.

This debt ratio is expected to continue even longer with passage of *Connecting Washington*. 
Impacts of Improving Vehicle MPG

As fleet MPG improves
fuel tax revenues decline

At 35 MPG, revenue declines 45% from 2016 levels
What does the Future Bring?

Washington is at a transportation funding crossroads

- Transportation infrastructure is aging.
- Inadequate investment in maintenance and preservation.
- Population is projected to grow by 21% in the next 20 years.
- Urban areas are torn between investing in preservation/maintenance or responding to increased demand.
- Rural areas are torn between investing in preservation/maintenance or economic development.
- A fixed fuel tax, the primary source of transportation revenue, doesn’t keep pace with increases in transportation costs and improving fuel efficiency.
- Debt service payments are absorbing most of the fuel tax revenue, leaving less money for new and on-going expenses.

The motor fuel tax is the largest component of state transportation funding.
A comprehensive and balanced statewide transportation plan.

RCW 47.04.280 sets forth six transportation policy goals:

- ECONOMIC VITALITY
- PRESERVATION
- SAFETY
- MOBILITY
- ENVIRONMENT
- STEWARDSHIP
WTP 2035 Strategies and Recommendations

- 25 broad strategies organized by policy goal.
- 102 specific recommendations to implement the strategies.
- Additional recommendations to strengthen the linkages between transportation and land use.
- Recommendations for delivering results:
  - Efficiencies and reforms
  - Additional transportation revenue.
WTP 2035 Key Messages

- Reliable, efficient freight movement is critical for jobs, balance of trade, and economic competitiveness.

- There is an important state role in planning and delivering multimodal transportation services and infrastructure, including public transportation:
  - key corridors
  - connecting communities
  - special needs transportation

- Secure, sustainable funding is needed to ensure the long-term preservation of existing infrastructure and to meet growing demand in many regions of the state.
The Future: More Tolling Likely

Tolling generated over $140 million in 2015.

• Build a project.
• Manage traffic.
• Build a project and manage traffic.

Newest toll facility:
• I-405 Express Toll Lanes opened September 27, 2015.

Future tolling authorized:
• I-405 Express Toll Lanes from Bellevue to Renton
• SR 99 Downtown Seattle Tunnel
• SR 167 to Port of Tacoma and SR 509 to I-5.
Tolling To Fund a Project

Tacoma Narrows Bridge

Project Cost: $735 million:

Toll Revenue makes bond payments and finances maintenance and operations.

Current Toll Rates for car

- Good to Go: $5.00
- Cash: $6.00
- Pay by Mail: $7.00

HOV & transit not exempt from tolls.
Tolling To Manage Traffic

I-405 Express Toll Lanes (ETLs) and SR 167 High Occupancy Toll (HOT) Lane Pilot Project

- Allows non-HOV drivers to buy into the HOV lanes.
- Toll rates dynamically adjust to reflect traffic conditions, aiming to average at least 45 mph, 95% of the time in peak hours.
- Average toll on I-405 ETLs: Less than $4.00.
- Average toll on SR 167: Less than $2.00.
- HOV & transit exempt from tolls.
Tolling to Fund a Project and Manage Traffic

SR 520 Replacement and HOV Lanes

- New floating bridge.
- Extends HOV lanes from Redmond to I-5.
- Project Cost: $4.56 billion.
- Variable tolling by time of day.
- Weekday Peak Car Toll Rates (July 1, 2016)
  - Good to Go! $4.10
  - Pay by Mail $6.10
- No tolls 11 pm – 5 am.
- Registered vanpools and transit are exempt from tolls. Transit ridership is up 52%.
A road usage charge is a per mile fee drivers would pay for the use of the road system, rather than paying by the gallon of gas.
Road Usage Charge Assessment

A deliberate and methodical evaluation:

2012: Road usage charging is feasible; identified a laundry list of policy and fiscal issues to be resolved.

2013: The business case for road usage charging is made and a policy framework developed.

2014: Transportation Commission recommends demonstration project to test road usage charge approaches, operations, and customer interaction.
WSDOT reports on how interstate travel under a RUC could function.
State Treasurer notes caution around elimination of gas tax and the role a road usage charge could play in our state financing.

2015: Legislature directs continued evaluation, including review of work in other states.
Oregon begins implementation of a voluntary road usage charge program. California prepares for a pilot program in July 2016.

2016: Begin preparation for a Washington demonstration project.
We have focused on four operational concepts to assess a road usage charge system:

- **Time Permit**: A flat fee to drive an unlimited number of miles for a given period of time (month or year).

- **Odometer Charge**: A per-mile charge measured by odometer readings.

- **Automated Distance Charge**: A per-mile charge measured by in-vehicle technology that can distinguish between in-state and out-of-state travel with periodic billing.

- **Smart Phone Application**: A smartphone application would be used for total mileage collection.
Thank you!
