Thank you for taking the Washington State Transportation Commission’s confidential and anonymous survey about transportation issues in your local area and across the State. It is your chance to let state transportation policymakers know what is most important to you.

1. To start, using an A, B, C, D or F grading scale, how would you rate Washington’s transportation system overall? (Select an answer and press NEXT below yellow box)

   - A Excellent: 2%
   - B Above Average: 24% ⇒ 26%
   - C Average: 45% ⇒ 45%
   - D Below Average: 21% ⇒ 28%
   - F Failing: 7%
   - Not sure: 1%

**DEFINITION:** When we say “Washington State’s transportation system” we mean the roads, highways, bridges, public transit, rail, ferries, airports, sidewalks, and bike lanes that connect the state to move people and goods.

2. How would you rate the transportation system in your local area - that is in your city or town and the areas immediately surrounding it?

   - A Excellent: 3%
   - B Above Average: 20% ⇒ 22%
   - C Average: 42% ⇒ 42%
   - D Below Average: 26% ⇒ 35%
   - F Failing: 9%
   - Not sure: %

**DEFINITION:** When we say the transportation system in “your local area” we mean any roads, highways, bridges, public transit, rail, ferries, airports, sidewalks, or bike lanes that connect your city or town and the areas immediately surrounding it to move people and goods.
3. What grade would you give the state for making sure your area of the state gets a fair share of transportation funding?

- A Excellent 3%
- B Above Average 14% ——> 17%
- C Average 36% ——> 36%
- D Below Average 24% ——> 35%
- F Failing 11%
- Not sure 12%

4. Do you agree or disagree with the following statement: The State needs additional revenue to keep our transportation system safe, effective and properly maintained.

- Strongly Agree 29%
- Somewhat Agree 33% ——> 62%
- Somewhat Disagree 17%
- Strongly Disagree 16% ——> 33%
- Not sure 5%

5. In general, would you support or oppose raising some transportation taxes and fees to increase funding for transportation?

- Strongly Support 19%
- Somewhat Support 32% ——> 51%
- Somewhat Oppose 17%
- Strongly Oppose 29% ——> 46%
- Not sure 3%

6. Would you support or oppose raising some transportation taxes and fees to increase funding for transportation if it would cost the average Washington family like yours an additional $30 a month?

- Strongly Support 11%
- Somewhat Support 21% ——> 32%
- Somewhat Oppose 19%
- Strongly Oppose 45% ——> 65%
- Not sure 4%

(IF OPPOSED/NOT SURE ASK Q7)

7. What if it cost the average Washington family like yours an additional $15 a month?

- Strongly Support 2%
- Somewhat Support 22% ——> 24%
- Somewhat Oppose 25%
- Strongly Oppose 48% ——> 72%
- Not sure 4%
8. What if it cost the average Washington family like yours an additional $7.50 a month?

(RESUME ASKING EVERYONE)

This next section is about transportation priorities. Please read the statement below and then press NEXT.

The Connecting Washington Task Force, a group of business leaders and local government, labor, and environmental leaders issued a report outlining a 10 year transportation strategy. The Task Force estimated that it will require an additional $5 billion per year over the next 10 years to fund our transportation system. Because of the difficult economy, the Task Force proposed a lower $2.1 billion per year in transportation investments to maintain our existing transportation system and provide some funds to meet the economic and travel needs of a growing population.

For each transportation category in the table below, please indicate what percentage, if any, of the need you would fund.

**Note:** This table shows the $2.1 billion per year in transportation needs by category along with a rough estimate of what it would cost the average household PER MONTH to completely fund that need.

You can give each category any percentage from 0% to 100% depending on how much you feel it should be funded. After you have responded for all 5 categories, the next page will show the total amount you chose to fund and the rough cost PER MONTH.

<table>
<thead>
<tr>

</tbody>
</table>
This next section is about new taxes and fees to fund transportation needs. Please read the information below and then press NEXT.

The table on the next page gives estimates of how much different taxes/fees would raise for transportation and how much the new taxes/fees would cost the average household based on the following state averages:

- Vehicles Owned: 2.5 Vehicles
- Vehicle Value: $6,200 per vehicle
- Miles Driven: 10,000 miles per vehicle per year
- Miles per Gallon: 20 MPG average

The cost to your household could be lower or higher depending on how many vehicles you own, how much you drive, what kind of gas mileage you get and how much your vehicles are worth.

For each of the 3 transportation taxes/fees in the table below – the Gas Tax, Motor Vehicle Excise Tax, and Vehicle License Fee, please indicate which tax/fee increases, if any, you support to fund those needs.

**NOTE:** All new revenue would only be used for transportation purposes.

14. **Amount Raised Total Cost Gas Tax - currently 37.5 cents a gallon**
   - 5¢/gal increase ($155 M/yr) ($5.21/mo.)  24%
   - 10¢/gal increase ($310 M/yr) ($10.42/mo.)  14%
   - 15¢/gal increase ($465 M/yr) ($15.63/mo.)  15%  ===> 53%
   - No Gas Tax increase  47%

15. **Motor Vehicle Excise Tax - currently no state MVET**
   - 0.7% MVET ($250 M/yr) ($9.04/mo.)  25%
   - 1.5% MVET ($536 M/yr) ($19.38/mo.)  14%
   - 2.4% MVET ($858 M/yr) ($31.05/mo.)  12%  ===> 52%
   - No State MVET  48%

16. **Vehicle License Fee - currently $30 per year**
   - $20 VLF increase ($158 M/yr) ($4.17/mo.)  33%
   - $45 VLF increase ($355 M/yr) ($9.38/mo.)  15%
   - $100 VLF increase ($790 M/yr) ($20.87/mo.)  7%  ===> 55%
   - No VLF increase  45%
17. Based on the above averages, compared to the type of vehicles you own and how much you drive, in general do you think the total transportation taxes you pay are higher, lower, or about the same as the average Washington household?

<table>
<thead>
<tr>

<tr>
<td>Much lower than average</td>
<td>12%</td>
</tr>
<tr>
<td>Not sure</td>
<td>5%</td>
</tr>
</tbody>
</table>

18. The state gas tax currently provides 76% of all state transportation funding. A combination of inflation, changing driving habits and increased fuel economy of vehicles, along with the growing numbers of electric vehicles, makes the gas tax an unsustainable transportation revenue source long-term. Meanwhile transportation needs (like maintaining our existing roads/bridges, building new roads/bridges, enhancing transit service, etc.) continue to expand with population growth. Knowing this, do you agree or disagree with the following statement: The State needs additional revenue to keep our transportation system safe, effective and properly maintained.

<table>
<thead>
<tr>
<th>Agreement</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Strongly Agree</td>
<td>25%</td>
</tr>
<tr>
<td>Somewhat Agree</td>
<td>40%</td>

<tr>
<td>Somewhat Disagree</td>
<td>14%</td>
</tr>
<tr>
<td>Strongly Disagree</td>
<td>18%</td>
</tr>
<tr>
<td>Not Sure</td>
<td>3%</td>
</tr>
</tbody>
</table>

19. Before this survey, were you aware or not of the funding challenges created by relying on the gas tax to provide three-fourths of our transportation revenue?

<table>
<thead>
<tr>
<th>Awareness</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes aware of funding shortfall</td>
<td>51%</td>
</tr>
<tr>
<td>No not aware of funding shortfall</td>
<td>29%</td>
</tr>
<tr>
<td>Don’t agree that there is a funding shortfall</td>
<td>21%</td>
</tr>
</tbody>
</table>
There are a number of long term funding options being considered to address the state’s long-term transportation financial challenges. For each revenue source, please indicate whether or not you think that method is a good way to help provide future funding for our transportation system.

<table>

<tr>
<td>25. An annual fee on vehicles that get over 50 miles per gallon – people with high MPG vehicles who pay lower gas taxes would be charged an additional fee</td>
<td>17%</td>
<td>21%</td>
<td>19%</td>
<td>38%</td>
<td>5%</td>
<td>38%</td>
</tr>
</tbody>
</table>
The next set of questions are about electronic tolling, that is, charging drivers a fee on some major highways and bridges in such a way that drivers do not have to stop at toll booths.

26. In general, do you support or oppose tolling as a way to help pay for new state transportation projects?

- Strongly Support 21%
- Somewhat Support 40% ==> 61%
- Somewhat Oppose 15%
- Strongly Oppose 23% ==> 37%
- Not sure 2%

**NOTE:** Electronically collected tolls are used in several places in Washington to help pay for new construction of state transportation projects like the Tacoma Narrows Bridge and the 520 Bridge in Seattle.

27. In general, do you support or oppose using tolls as a way to help pay to maintain and improve some existing state highways and bridges?

- Strongly Support 18%
- Somewhat Support 40% ==> 58%
- Somewhat Oppose 17%
- Strongly Oppose 23% ==> 40%
- Not sure 2%

**NOTE:** This would be placing tolls on some existing roads and bridges to help fund ongoing maintenance needs and pay for needed improvements that are currently unfunded. For example, using tolling to fund Snoqualmie pass snow removal, avalanche control, and pay for long-term improvements to minimize pass closures?

28. In general, do you support or oppose using tolls as a way to help manage traffic congestion?

- Strongly Support 14%
- Somewhat Support 31% ==> 46%
- Somewhat Oppose 19%
- Strongly Oppose 30% ==> 49%
- Not sure 5%

**NOTE:** What about using tolling to manage traffic congestion? Roads and bridges that serve the same travel corridor would be tolled to reduce diversion to the “free route” and manage congestion on both roads. An example would be to toll both SR 520 and Interstate 90 to balance and manage traffic flows across Lake Washington.
29. Which of the following statements on the use of toll money is closest to your opinion:

**Tolls Benefit Specific Project Only:**
Toll money should only be used for the construction and maintenance of the specific road or bridge where the toll is collected. For example, tolls collected on the SR 520 bridge should only be used for construction and maintenance of the SR 520 bridge. 36%

**Tolls Benefit Project plus Local Travel Corridor:**
Toll money should be available to fund maintenance and improvements on roads and bridges within the travel corridor. For example, tolls collected on the SR 520 bridge could be spent on the SR 520 bridge AND the SR 520 bridge and I-5 and I-405 connections to the 520 bridge. 38%

**Tolls Benefit All Toll Projects Statewide:**
Toll money should not be limited to any specific toll project or corridor. Money should be pooled and used to benefit all toll projects in the state. For example if the SR 520 bridge and I-90 bridge were tolled the money would be combined and dedicated to helping fund and operate all toll projects statewide. 18%

Not Sure 8%

30. Regardless which toll option you chose, do you think toll money should be available to help fund transit?

Yes Toll money should be available for transit 41%

No Toll money should not be available for transit 49%

Not Sure 11%
I’d like to ask you about an annual fee on vehicles that get over 50 miles per gallon. This fee would help recover some of the gas tax revenues that these drivers of high MPG cars do not currently pay so that all drivers contribute their share to transportation funding.

31. In general, do you support or oppose a $200 per year flat fee on vehicles that get over 50 miles per gallon?
   
<table>
<thead>
<tr>
<th>Support Level</th>
