

SEA-TAC AIRPORT

Sustainable Airport

Master Plan

Sea-Tac's Sustainable Airport Master Plan is a long-term blueprint for airport development to meet the needs of the traveling public, while reducing environmental and social impacts. The plan includes airfield development within the current three-runway configuration, terminal development, roadway improvements, and facility modernization and expansion possibilities.

Completion of the plan will make Sea-Tac the first large hub U.S. airport to fully incorporate sustainability as a key planning component.

Why is the Plan Needed?

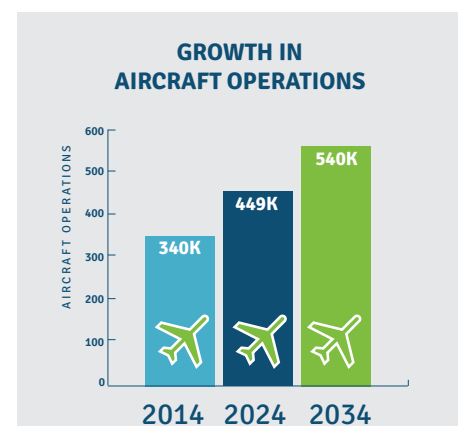

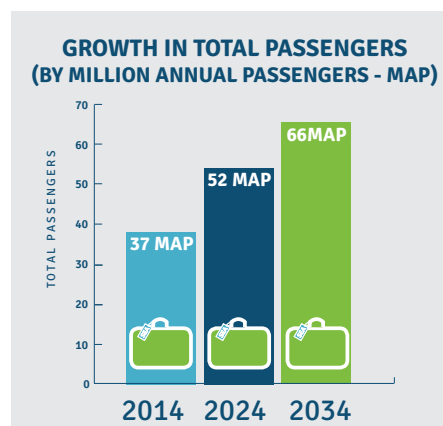

The plan is needed to accommodate continued strong passenger growth at the airport. In 2014, Sea-Tac served more than 37 million passengers. This figure could reach 52 million over the next decade and could be as high as 66 million in 2034.

In addition to forecasting future demand, the plan takes stock of current facilities, infrastructure, operations and passenger levels, looking at scenarios that are five, 10, and 20 years in the future. It includes air quality, energy and water conservation, recycling and other strategic environmental goals, and will align with the Port's Century Agenda sustainability and energy efficiency goals.

Project Goals:

- Provide a quality experience for customers in the long-term
- Provide adequate facilities to continue to serve as one of our state's primary economic engines
- Include a strong emphasis on environmental sustainability

AIRPORT TRAFFIC WILL GROW BY 14 MILLION ENPLANEMENTS (29 MILLION TOTAL PASSENGERS) IN THE NEXT 20 YEARS

Key Plan Elements

- Forecasts of future airport traffic, operations, and passenger growth
- Criteria and constraints to inform future improvements
- Proposed options for future improvements at Sea-Tac Airport:
 - Airfield
 - Terminal
 - Landside (vehicle access, regional roadway connections, and parking)
- Integration of environmental objectives, social responsibility, and economic sustainability strategies into the plan

| Planning Timeline | 2014 | | 2015 | | | | 2016 | | | |
|--|--------|------|--------|--------|--------|------|--------|--------|--------|------|
| | Summer | Fall | Winter | Spring | Summer | Fall | Winter | Spring | Summer | Fall |
| Develop forecasts | ■ | ■ | ■ | | | | | | | |
| Alternatives analysis and plan development | | ■ | ■ | ■ | ■ | | | | | |
| Develop financing for capital program | | | | | | ■ | ■ | | | |
| Environmental review of plan | | | | ■ | ■ | ■ | ■ | ■ | ■ | ■ |
| Final plan adoption | | | | | | | | | | ■ |
| Public outreach and comment | | | ■ | ■ | ■ | ■ | | | | |

What work is under way?

- Finalizing growth forecasts
- Developing and analyzing options
- Gathering public input about options

How to get involved:

- Visit the project website for additional materials and to learn more about upcoming meetings
- Sign up to receive email updates to keep up-to-date throughout the SAMP process
 - Go to the Port of Seattle website
 - Click “Email updates”
 - Select the “Sustainable Airport Master Plan (SAMP)” box

Upcoming opportunities:

- Public meeting (summer 2015): Review and comment on preferred alternatives
- Public meeting (fall 2015): Review and comment on proposed plan alternative

Future outreach opportunities beyond 2015 will be scheduled in association with the environmental review for the SAMP.
