AV Work Group Update

October 20, 2020

COVID-19 Impacts on Work Group Activity

- **A challenging year for Work Group efforts and recommendations**
 - » Sudden shift to virtual constrained collaboration and progress
 - » Public and Private Sector attention shifted to response / recovery, and keeping the lights on
 - » Budget restrictions and cuts – short and long term effects on Work Group recommendations and actions
- **AV development and testing has been disrupted and motivated to shift**
 - » COVID-19 put the brakes on elements of AV development previously a priority
 - » Highlighted key use cases to focus AV testing and deployment on (e.g. contactless delivery)

Opportunity to Refocus

Re-evaluate Work Group priorities and road map

Provide discrete direction to subcommittees

Long-Term Impact of COVID-19 on AV and Mobility

What do the trendlines tell us today?

What trends are likely to stick?

What are the impacts of the economic damage?

Long-Term Impact of COVID-19 on AV and Mobility

- **Delivery use cases more likely to be here to stay**
 - » COVID accelerating use case that is not COVID-dependent
 - » Opportunity for increased policy focus
- **COVID likely to delay AV service launches**
 - » Economic impact on development
 - » Concerns on multiple passengers/vehicle cleaning
- **Uncertain impact on long-term fundamentals**
 - » Nature of work is set to change, but long term impacts are unclear
 - » Where people choose to live may also change with different work arrangements

Executive Committee Future Path Work Session

- **Overarching questions posed to the Executive Committee (EC):**
 - » What should the focus of the Work Group be through to the sunset date of 2023?
 - » What role the Cooperative Automated Transportation (CAT) policy goals adopted by the EC play in guiding that direction?
- **Proposal put forward on use of CAT policy goals as a framework for action**
- **Live-polling exercise used to identify priorities and direction for the Work Group's path moving forward**

Adopted CAT Policy Goals

- **#1 Organize for Innovation:** Enable organizational change that empowers officials to be flexible, accelerate decision-making, and adapt to changing technology.
- **#2 Shared Mobility:** Encourage and incentivize shared mobility, including an emphasis on high occupancy and shared modes for moving people and goods.
- **#3 Economic Vitality and Livability:** Create resilient and efficient regional networks and empower local agencies to create resilient, multimodal local networks.
- **#4 Infrastructure and Context Sensitive Street Design:** Promote durable, physical and digital networks that accommodate the movement of people and goods in ways that are appropriate for the context.

(continued)
Adopted CAT
Policy Goals

(continued)

- **#5 Land Use:** Encourage land use development patterns that support multimodal connectivity to efficient local and regional networks.
- **#6 Equity:** Work with marginalized communities to increase access to desirable mobility options.
- **#7 Safety:** Increase the safety of transportation systems and infrastructure to support the safe movement of people and goods.
- **#8 Environment:** Reduce the local and cumulative environmental impacts of mobility to improve air and water quality, energy conservation and mitigate climate change.

Re-cap of Questions from the Live Polling Exercise

Part 1 Rank in Order of Priority

- » Broad Work Group focus areas
- » Near-term testing activities
- » Deployment-oriented activities
- » CAT-oriented activities

Used to establish prioritization of key actions

Part 2 Free-form Questions:

- » What action or focus area did you not see that you feel should be prioritized?
- » In a few words, what single outcome do you see as the most critical to the success of this group?

Used to provide context for contributing or supplementary actions

RANKING QUESTION #1:

Broad Work Group Focus Areas

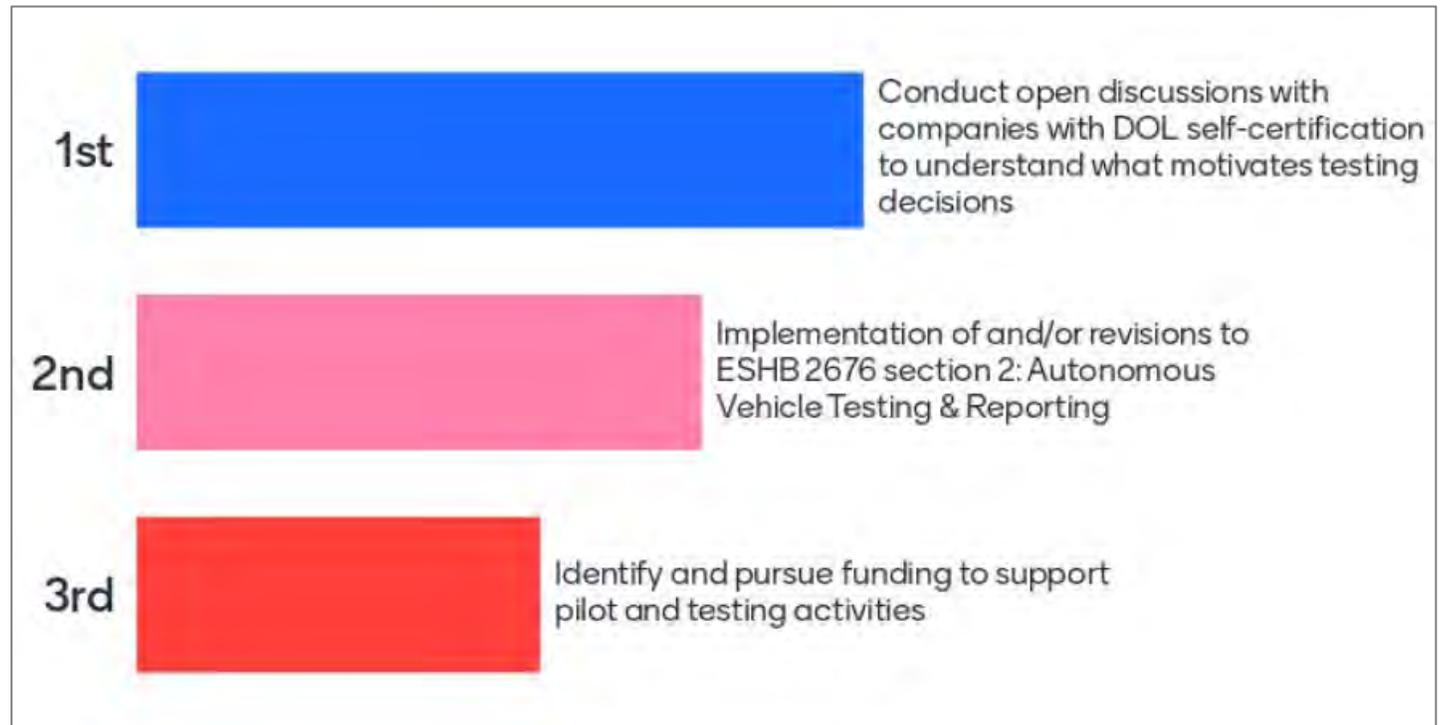

- Results showed no strong preference on how to prioritize broad Work Group focus areas
- Split outcomes possibly due to a balance of differing perspectives across the EC on Work Group priorities

RANKING QUESTION #2:

Near-term testing activities

- Results showed clear interest in having open discussions with companies undergoing testing
- Understanding of motivations for testing may help to inform further policy revisions and implementation

RANKING QUESTION #3:

Deployment- oriented activities

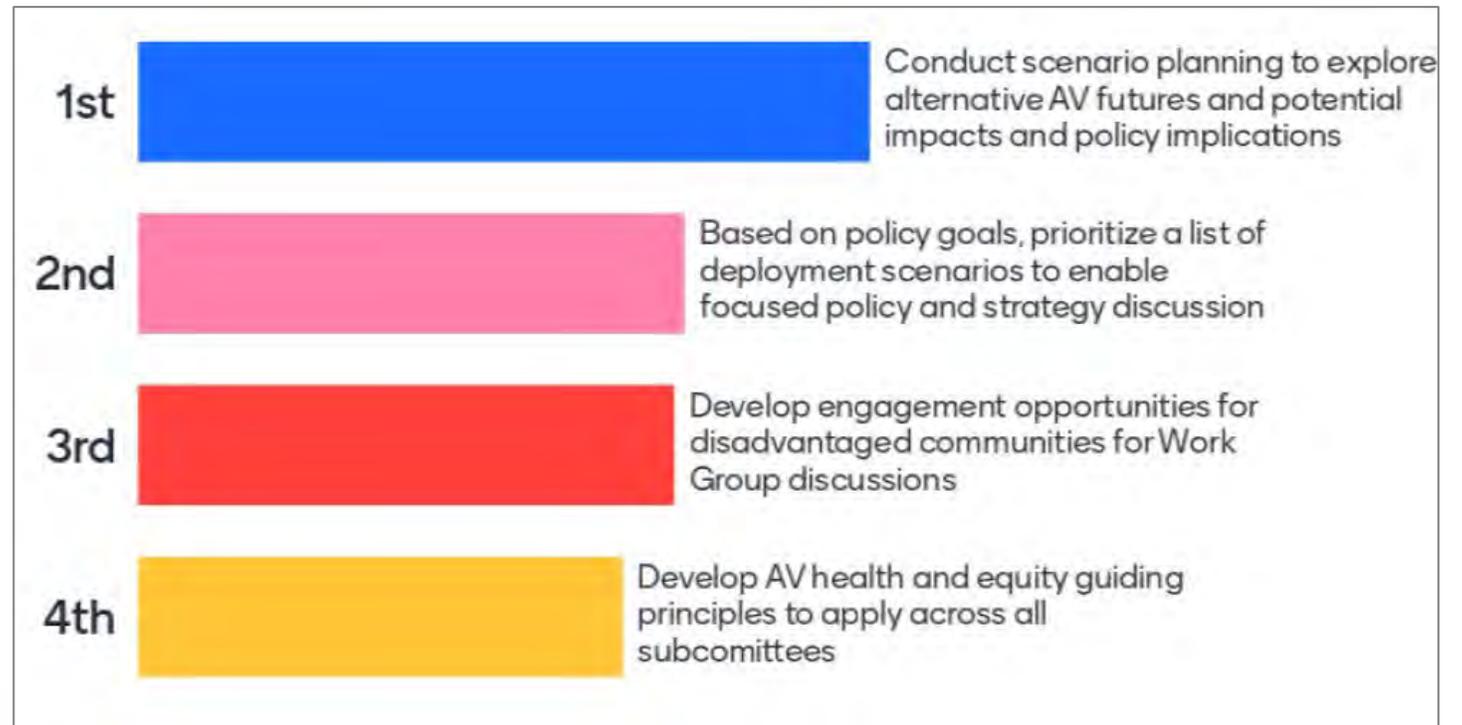

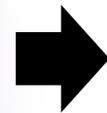

- Results signal particular interest in actions that help lay the groundwork for deployment, including:
 - » Near-term infrastructure investments
 - » Topics requiring legislative reform
 - » AV data guiding principles

RANKING QUESTION #4:

CAT-oriented activities

- Results suggest continued interest in conducting scenario planning to explore alternative AV futures
- This may point to a potential interest/need for better understanding of impacts and policy implications

Matrix of Contributing Actions

- Prioritizes actions and outlines potential contributing actions for each subcommittee
- These are suggestions/recommendations, not a mandate/must
- Meant to start discussion and help subcommittees see how they fit in the bigger picture of each action
- Provides context for the priorities identified for each focus area/action

					Work Group Subcommittee	...
					Description of Subcommittee	...
Broad Focus Area	Rank	Action	Description	Workgroup Roles	<i>contributing action</i>	..
Broad focus area grouping	Priority of Action	Overarching Action	Description of the action	Overview of Roles	Description of contribution actions	...
					Examples	...

Example Action #1

“Conduct open discussions with companies with DOL self-certification to understand what motivates testing decisions.”

Other subcommittees contribute to discussion

Licensing Subcommittee facilitates discussions

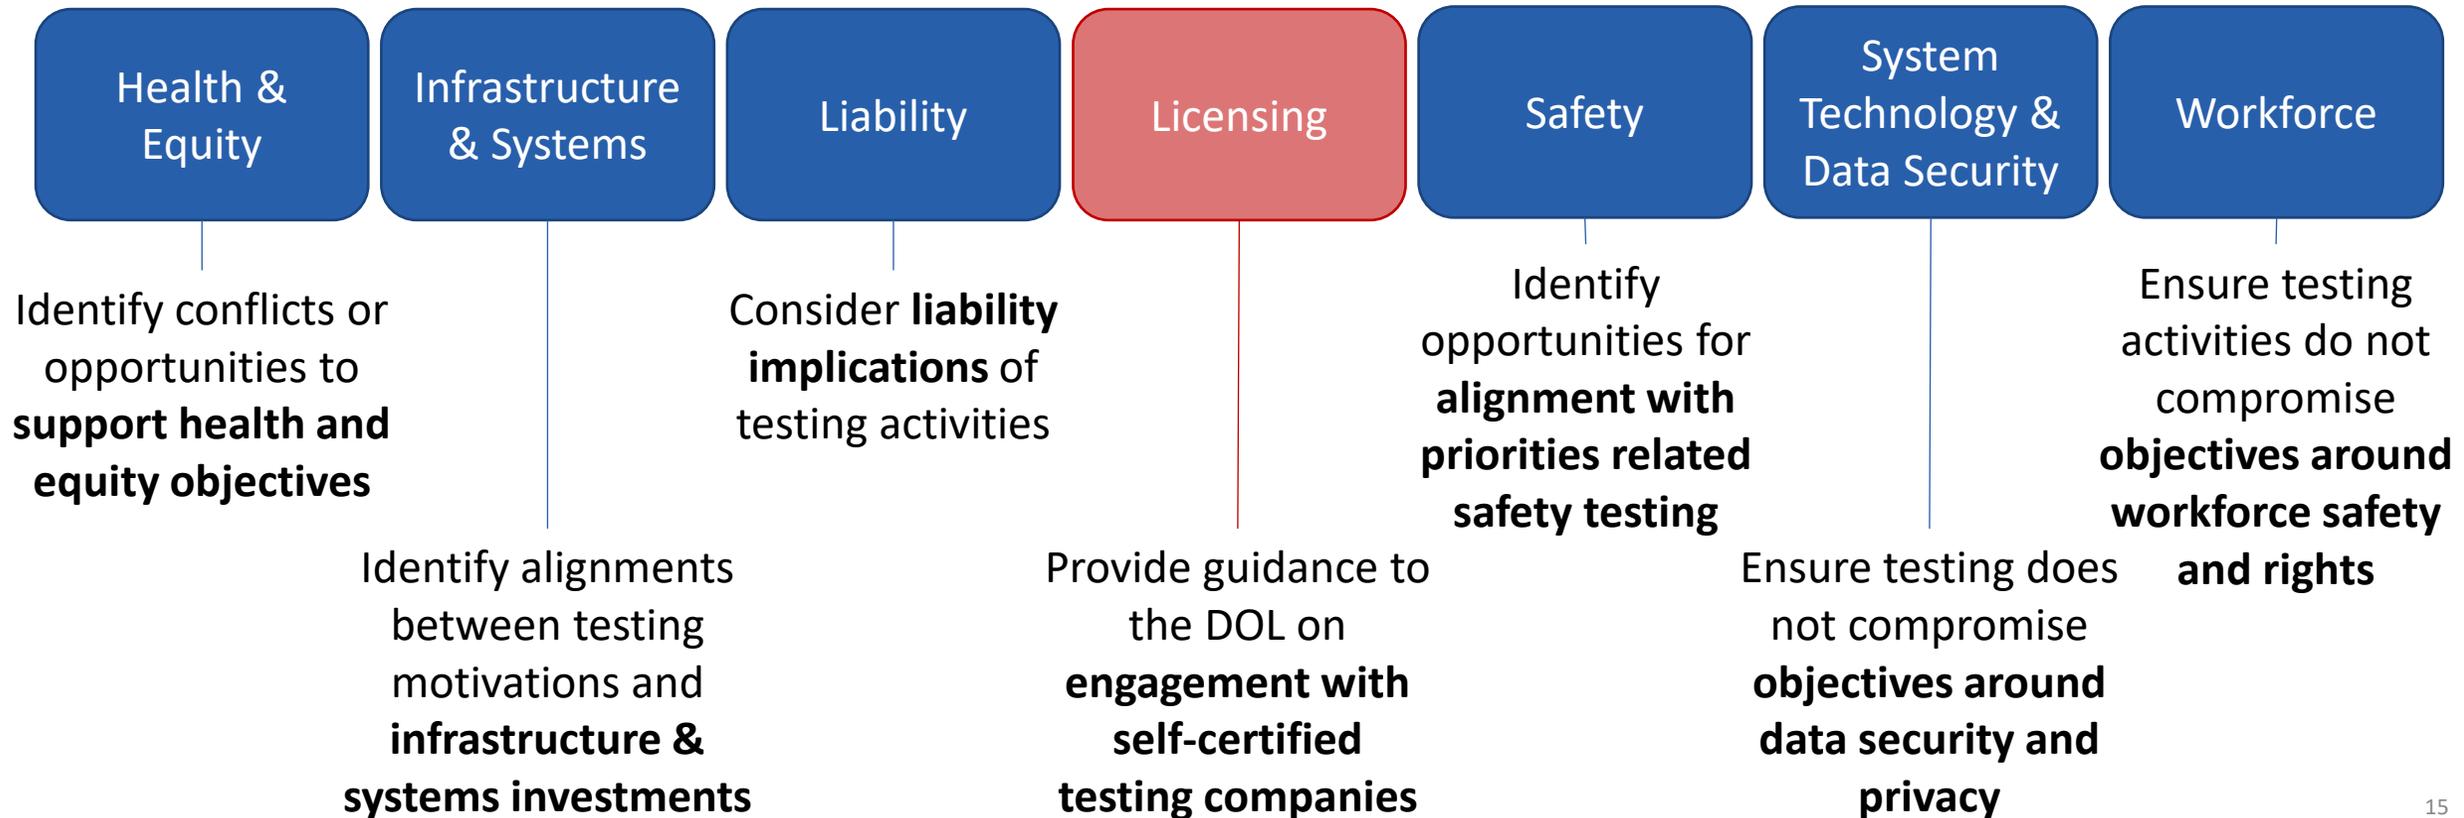

Other subcommittees contribute to discussion

Executive Committee	Health and Equity Subcommittee	Infrastructure & Systems Subcommittee	Liability Subcommittee	Licensing Subcommittee	Safety Subcommittee	System Technology & Data Security Subcommittee	Workforce Subcommittee
<i>contributing action</i>	<i>contributing action</i>	<i>contributing action</i>	<i>contributing action</i>	<i>contributing action</i>	<i>contributing action</i>	<i>contributing action</i>	<i>contributing action</i>
Contribute to the discussion and ensure that key questions and considerations around motivations for testing are considered.	Contribute to discussions as a subcommittee and/or as its members desire.	Contribute to discussions as a subcommittee and/or as its members desire.	Contribute to discussions as a subcommittee and/or as its members desire.	Facilitate and/or provide guidance on discussions with self-certified companies.	Contribute to discussions as a subcommittee and/or as its members desire.	Contribute to discussions as a subcommittee and/or as its members desire.	Contribute to discussions as a subcommittee and/or as its members desire.
For example: <ul style="list-style-type: none"> Provide an overarching perspective on testing considerations to address areas not covered by any subcommittee Ensure a balance of perspectives are considered 	For example: <ul style="list-style-type: none"> Ensure motivations for testing decisions do not conflict with health and equity objectives Identify opportunities where testing decisions may be leveraged in support of health and equity objectives 	For example: <ul style="list-style-type: none"> Identify potential alignment between motivations for testing and priorities from the perspective of infrastructure and other supporting systems Identify infrastructure and systems needs that may encourage testing opportunities 	For example: <ul style="list-style-type: none"> Consider the liability implications of various testing scenarios that are of interest to industry partners 	For example: <ul style="list-style-type: none"> Engage self-certifying entities through the DOL Provide guidance to the DOL on interviews and/or workshops with self-certifying entities 	For example: <ul style="list-style-type: none"> Ensure motivations for testing decisions do not conflict with or compromise safety objectives Identify potential alignment between motivations for testing decisions and priorities for testing related to safety 	For example: <ul style="list-style-type: none"> Ensure motivations for testing decisions to do not conflict with or compromise objectives around data security and privacy Identify potential alignment between motivations for testing decisions and priorities for system technology and data security 	For example: <ul style="list-style-type: none"> Ensure that motivations for testing decisions do not conflict with or compromise objectives related to workforce safety and rights

Example Action #1

“Conduct open discussions with companies with DOL self-certification to understand what motivates testing decisions.”

Example Action #2

“Develop AV health and equity guiding principles to apply across all subcommittees.”

Health and Equity Subcommittee leads the development

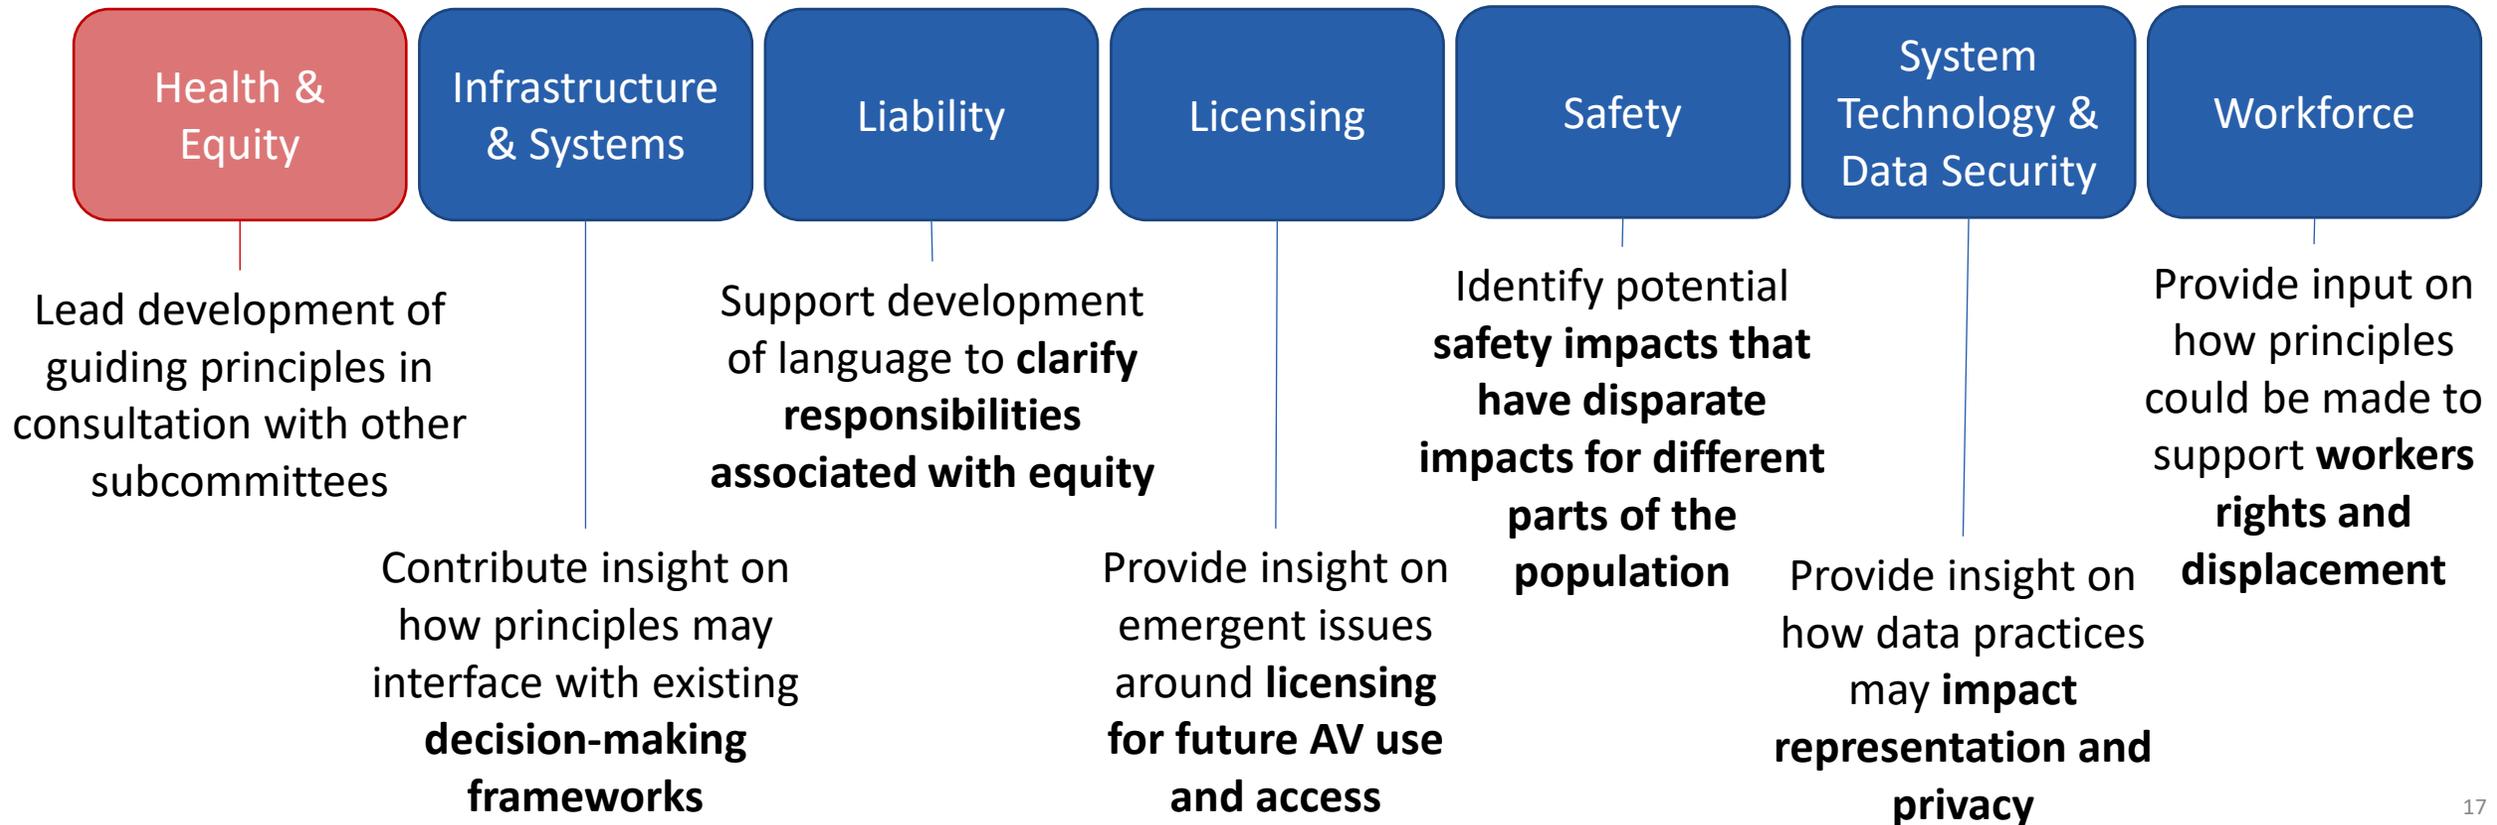

Other subcommittees provide insight on use cases and applicability to support development

Executive Committee	Health and Equity Subcommittee	Infrastructure & Systems Subcommittee	Liability Subcommittee	Licensing Subcommittee	Safety Subcommittee	System Technology & Data Security Subcommittee	Workforce Subcommittee
<i>contributing action</i>	<i>contributing action</i>	<i>contributing action</i>	<i>contributing action</i>	<i>contributing action</i>	<i>contributing action</i>	<i>contributing action</i>	<i>contributing action</i>
<p>Review and serve as a clearinghouse for health and equity guiding principles put forward by the Work Group.</p>	<p>Lead the development of health and equity guiding principles in consultation with other subcommittees to ensure applicability.</p> <p>For example:</p> <ul style="list-style-type: none"> • Research and evaluate industry and national best practices on health and equity principles related to AVs • Consult with other subcommittees on approaches to maximize the utility of the health and equity principles for their work 	<p>Provide insight on how the health and equity guiding principles can interact with the work of the subcommittee, and give insight on ways to make the principles broadly applicable.</p> <p>For example:</p> <ul style="list-style-type: none"> • Support the Health and Equity Subcommittee by providing information on how principles may interact with standard infrastructure investment decision making processes and existing evaluation frameworks. 	<p>Provide insight on how the health and equity guiding principles can interact with the work of the subcommittee, and give insight on ways to make the principles broadly applicable.</p> <p>For example:</p> <ul style="list-style-type: none"> • Consider the responsibility that different actors within the AV environment have in upholding health and equity, and support the development of language in the guiding principles that clarify expectations in this area. 	<p>Provide insight on how the health and equity guiding principles can interact with the work of the subcommittee, and give insight on ways to make the principles broadly applicable.</p> <p>For example:</p> <ul style="list-style-type: none"> • Provide insight on existing equity challenges related to licensing, such as the ability for different parts of the population to access licenses due to issues such as cost, or access to training and testing, and consider how these implications will manifest in an AV 	<p>Provide insight on how the health and equity guiding principles can interact with the work of the subcommittee, and give insight on ways to make the principles broadly applicable.</p> <p>For example:</p> <ul style="list-style-type: none"> • Contribute to the health and equity guiding principles by identifying potential safety implications that have disparate impacts for different parts of the population 	<p>Provide insight on how the health and equity guiding principles can interact with the work of the subcommittee, and give insight on ways to make the principles broadly applicable.</p> <p>For example:</p> <ul style="list-style-type: none"> • Provide insight into how existing and emerging data collection and management practices impact the representation and privacy of various parts of the population. 	<p>Provide insight on how the health and equity guiding principles can interact with the work of the subcommittee, and give insight on ways to make the principles broadly applicable.</p> <p>For example:</p> <ul style="list-style-type: none"> • Provide input on how the health and equity guiding principles could be made applicable to the protection of worker rights, and in the development of training programs aimed at countering dislocation of workers

Example Action #2

“Develop AV health and equity guiding principles to apply across all subcommittees.”

Other Sample Actions

- Implementation of ESHB 2676 (AV testing and reporting)
- Identify and pursue pilot funding
- Prioritize near-term infrastructure investments
- Prioritize topics needing legislative reform
- Develop AV data guiding principles
- Review ULC model bill language
- Develop education plan for ADAS and AV
- Conduct scenario planning to explore alternative AV futures
- Prioritize a list of deployment scenarios
- Develop engagement plan for disadvantaged communities

Examining Other States' Regulatory Frameworks

California	Arizona
Adopted Regulations	Governor's Executive Order
Multiple agencies with regulatory authority (DMV, CHP, CPUC)	One agency with regulatory authority (DOT)
"Heavy touch" regulatory environment	"Light touch" regulatory environment
Applicable to SAE Level 3 thru 5	Applicable to SAE Level 4 thru 5
Permit application, fee, and approval	Self-certification
\$5 million insurance policy (or equivalent)	No requirement beyond existing motor vehicle insurance requirements
Law enforcement interaction protocol for driverless vehicle testing	Law enforcement interaction protocol required for all AV operations
Passenger services pilot program in second year	Allows passenger services operations

AV Industry Panels

Cruise

LM Industries Group

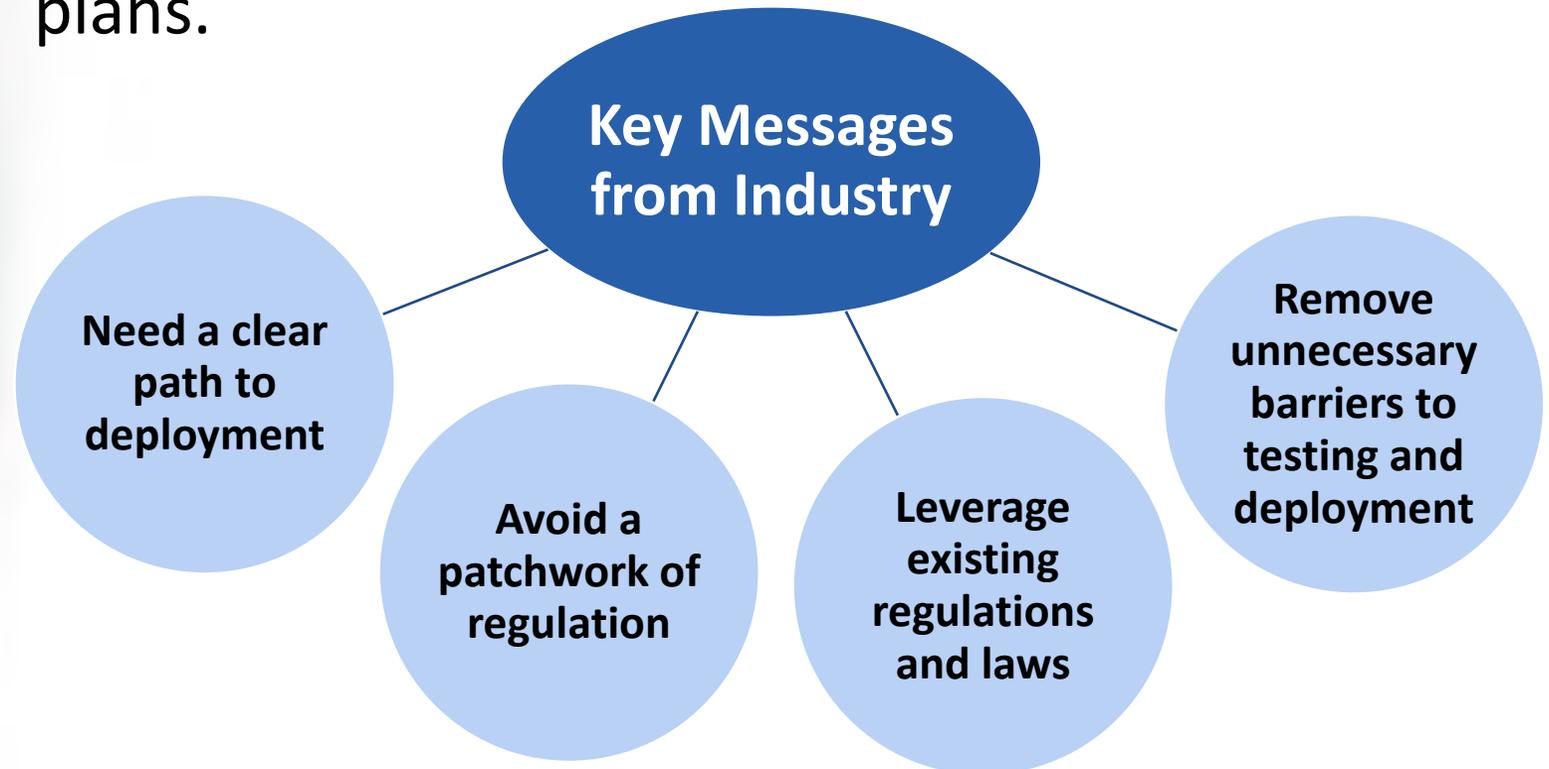

Beep

Aurora

EasyMile

Self-Driving Coalition
for Safer Streets

Industry representatives shared their insights and experiences testing in other states, offered input into Washington State's AV policy development, and provided overviews of work, products, and future plans.

Focus on Washington State AV Policies

House Bill 2676 - Minimum Requirements for AV Testing

- Passed legislature and signed by Governor Inslee March 2020
- RCW 46.92.010 – Self-certification requirements (effective October 2021)
 - » Outlines required information and unique identification number
 - » Specifies collision and moving violation reporting requirements
 - » Notification of testing activities
- RCW 46.30.050 – Liability insurance requirement
 - » Requires umbrella liability insurance policy for no less than \$5 million per occurrence in order to test on public roadways

Focus on Washington State AV Policies

House Bill 2470 – Automated Operation of Vehicles

- HB 2470 introduced in 2020 session, not passed
- Would place authority into State agencies' hands to certify and manage AV qualifications to operate on public roadways
- Varying perspectives on level of regulation needed and the State's role
 - » Presentation from Uniform Law Commission on history and intent of Model AV Bill used to draft HB 2470
 - » Presentation from industry on alternatives to HB 2470 / Model AV Bill that removes potential restrictions to innovation and deployments

Expert Presentations

- **University of Washington Law School – AV Law National Scan**
 - » AV Policies and Initiatives from all 50 states
 - » Scanned topics included ongoing testing, local preemption, oversight entities, infrastructure development, safety, data and privacy concerns, public education, liability and insurance, and health and equity concerns

- **Expert presentations to Subcommittees**
 - » Infrastructure initiatives
 - » Other states' AV progress and lessons learned
 - » ADAS advancements and challenges
 - » Cybersecurity
 - » Emerging mobility and equity

Next Steps

Final Executive Committee meeting this year: November 12th

- Recommendations from multiple subcommittees anticipated
 - » Path to clarify what vehicles are subject to AV regulations in Washington
 - » Development of a law enforcement interaction plan requirement
 - » Structured public outreach and engagement process
 - » Public-private partnership to report on testing locations – traffic safety, demographics, area characteristics – to help inform future decision making

Annual Report to the Legislature: Due date pushed to January 8th, 2021

Thank You!
