Facebook Transportation

Vision
Bring everyone together in person at Facebook every business day.

Mission
Ensure high quality commute and campus options are available that reduce barriers to bringing our people together.
Framework & Philosophy

• Facebook Growth
• Flexibility & Productivity
• Sustainability & Scalability
• Safe, Efficient & Reliable
• Philosophy: Transparency & Opportunity Cost
Seattle's Drive Alone Rate

19%
270,000 Seattle shuttle trips in 1 year!
3M Kilograms of CO2 saved in Seattle, 2018
Transportation Options

VANPOOL
5 riders, 3x a week
Free vehicle, gas, maintenance, tolls, insurance, and parking

PUBLIC TRANSIT
ORCA cards for unlimited regional transit

BIKE PROGRAM
Bike Storage and Amenities
Free Bike Repairs, Workshops, and Classes

FLEX OPTIONS
Rideshare Program
Emergency Ride Home
Spring District
WHY DO WE NEED IT?

The project connects the Eastrail, the principal north-south bike route on the east side, with the SR 520 trail, the highest volume east-west route.

The Eastrail currently passes under the route of the SR 520 trail, with a grade difference of over 20 vertical feet.

HOW WILL IT BE BUILT?

- Connector will be built as an elevated boardwalk supported by pin piles.
- Minimize environmental impact and be a distinctive structure with opportunities for design enhancement.
- In addition to the ramp, the project also includes bike-friendly modifications to the signalized intersection where the ramp meets Northup Way.
